

TECHNICAL SKILLS

LANGUAGES

PHP (Core & OOP)

PHP 8+

JavaScript (ES6+)

TypeScript

SQL

C++

HTML5 / CSS3

PHP & BACKEND

Laravel Framework

Eloquent ORM

Blade Templating

PHP PDO / MySQLi

Node.js

Express.js

RESTful APIs

FRONTEND STACK

React.js

Next.js

Tailwind CSS

Alpine.js

Context API

DATABASES & ORM

MySQL

PostgreSQL

MongoDB

Prisma ORM

TOOLS & ENVIRONMENT

Git & GitHub

Composer

Postman

Firebase

VS Code

Vercel

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – 2027

Jawaharlal Nehru Post Graduate College,
Barabanki

Affiliated to Dr. RMLAU

ACHIEVEMENTS

- Team Lead Promotion:** Managed 20+ developers in Agile workflows at CodexConquer.
- Best Performer:** Monthly award for backend architecture & PHP API optimizations.
- Walmart Simulation:** Advanced Software Engineering Job Simulation on Forge.
- Full-Stack Mastery:** Architected 5+ production-grade web applications.

CORE COMPETENCIES

- MVC Architecture & Design Patterns
- Object-Oriented Programming (OOP)
- RESTful API Design & Postman Testing
- Relational & NoSQL Data Modeling
- Agile/Scrum & Team Mentorship

PROFILE SUMMARY

Results-driven Full Stack & **PHP / Laravel Developer** with extensive hands-on experience building scalable, secure backend systems and dynamic web applications using **PHP (Core & OOP 8+), Laravel Framework, MySQL, PostgreSQL, Next.js, React, and Node.js**. Proven track record in designing RESTful APIs, database schema migrations, and leading developer teams of 20+ in fast-paced Agile environments to deliver robust, high-performance software.

WORK EXPERIENCE

FULL STACK & PHP / LARAVEL DEVELOPER INTERN | CodexConquer Jan 2026 – Apr 2026

- Architected full-stack web applications and scalable RESTful APIs using **PHP 8 (OOP), Laravel, MySQL, Next.js, and React** leveraging clean MVC design patterns.
- Promoted to **Team Leader**; managed, mentored, and assigned tasks to a team of **20+ developers** in an Agile environment, overseeing daily standups and sprint planning.
- Engineered custom PHP controllers, Eloquent ORM database models, migrations, and JWT authentication middleware, reducing backend API response latency by 35%.
- Conducted systematic code reviews, standardized Git branching workflows, and enforced strict code quality across team repositories.
- Honored with **"Best Performer of the Month"** for technical excellence, database query optimization, and exceptional team leadership.

KEY PROJECTS

PHP / Laravel E-Commerce & Service API Backend

PHP 8 (OOP) • Laravel • MySQL • Eloquent • REST API

- Designed modular REST APIs and backend portal in Laravel featuring role-based authorization (Sanctum/JWT), product management, order processing, and MySQL query optimization.
- Implemented automated database migrations, Eloquent relationship mapping, and Postman API test suites for seamless deployment.

Slack Clone – Realtime Collaboration Platform

Next.js • PostgreSQL • Prisma • Socket.io

- Engineered real-time messaging application supporting workspace channels, direct messages, dynamic presence tracking, and media uploads.
- Integrated Socket.io for instant bi-directional communication and Prisma ORM for type-safe PostgreSQL database operations.

AI Code Solver – Intelligent Developer Assistant

React • Node.js • Gemini API • Express.js

- Built an AI code analysis tool leveraging Google Gemini API for automated syntax error detection, bug fixing, and logic optimization.
- Designed responsive React frontend featuring code snippet formatting, instant execution previews, and custom prompt templates.

URL Shortener & Food Delivery Platform

PHP / Node.js • Express • MongoDB • React • Tailwind

- Designed high-throughput URL shortening service with click analytics alongside a food ordering web app with live cart calculation.
